

The stutter step: one idealized trial, and the rate of each of its moves in the population

Left is authored, not data; its parameters are AdSERP medians. Right reads the producers: survey_above_fold, next_action_by_position, return_is_memory, major_saccade_selection. [LAB, AdSERP, typed]

(a) Idealized trial on an ad-topped page

(b) The same stages in the population (AdSERP, 2,603 trials, 47 participants)
