

Gaze scanpath around the parked cursor — three coupling regimes

Blue dot = cursor median position (the anchor). Dashed halo = cursor IQR (spread). Numbered circles = fixations in order, sized by duration. Lines = saccades. Yellow star = click.

EVALUATED-REJECTED
(gaze clusters
on parked cursor)

DEFERRED
(gaze revisits,
cursor parked offset)

CLICKED
(gaze roams page,
cursor trails)
